REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Nishimura et al (US 5,989,019), cited in the office action mailed 5/21/2008, teaches setting the ratio of the amount of the primary air to the amount of secondary air in the burner to 0.6-0.8 (column 1, lines 64-66). However, Nishimura et al does not disclose or suggest that the secondary combustion air is oxygen-enriched air or controlling the oxygen concentration. Kamikawa et al (US 6,413,471 B1) teaches a rotary hearth furnace with burners and an air supply for supplying secondary combustion air. The amount of secondary combustion air from the air supply portions are controlled so that the CO ratio will take an appropriate value (column 9, line 63 to column 10, line 19). However, Kamikawa et al does not disclose or suggest controlling the oxygen concentration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
